INT.CL. : F01N 7/20 B60K 13/04

TITLE : MUFFLER DEVICE

ABSTRACT : PURPOSE: To prevent infiltration of mud and the like from a wheel into an exhaust opening part and the like of a muffler tail by positioning, a peripheral edge part outside of a car body, out of the rear end peripheral edges of the muffler tail, ahead of a peripheral edge inside the car body.

CONSTITUTION: The rear end outer peripheral edge 31 of a muffler tail 16 which continues in one body to a horizontal part of a muffler 12 is configured such that a peripheral edge part 31a outside of a car body is positioned ahead of a peripheral edge part 31b inside the car body, and a lower peripheral edge part 31c is positioned ahead of an upper peripheral edge part 31d, and further forwardly recessed parts 31e, 31f are formed in the lower parts of the above-mentioned outer peripheral edge part 31a and the inside peripheral edge part 31b respectively, and furthermore said edge parts 31e, 31f are positioned somewhat ahead of or equally to the lower end part 31g of the peripheral edge part 31.
